## EDUCATION

### University of Central Florida

*Bachelor of Science in Computer Science + Minor in Mathematics*

Orlando, FL

Aug. 2021 - May 2025

## TECHNICAL SKILLS

**Languages:** Java, Python, C, C++, Go, HTML, CSS, JavaScript, TypeScript, SQL

**Frameworks:** TailwindCSS, React, Express, Astro, Vite, TensorFlow

**Software:** Git, Github, Gitlab, VS Code, IntelliJ, Ubuntu, Microsoft Excel

## EXPERIENCE

### Lockheed Martin

*CWEP Intern*

June 2023 - Present

- Analyzed and documented Dev-Ops CI pipelines
- Implementing and integrating embedded systems software using C++

### Knight Hacks

*Back-end Development Member*

Oct. 2022 – Present

- Implemented query resolver functions using SQL and GraphQL
- Integrated and tested query resolver functions with other backend members
- Helping other students with math or programming problems

### Shell Hacks hackathon

*Team Member*

Sep. 2022

- Worked with 3 teammates to implement a folder that organizes direct messages for Twitter within a time crunch
- Worked on the back-end using Python with the Flask framework to implement an API that allows you to create a folder and where you want the direct messages to go

### FIRST Robotics

*Programming Lead*

Aug. 2020 - May 2021

- Introduced GitHub and Object-Oriented programming to middle and high school students looking to get into Robotics
- Worked on programming the movement of the robot and organized/wired the electronics
- Performed hardware integration testing on the movement of the robot and scoring capabilities

## PROJECTS

### Personal Portfolio | TypeScript, React, TailwindCSS, Astro

May 2023 - Present

- A personal website that showcases some of my projects over time.
- Using TailwindCSS to create and design a good UI/UX

### Grocery App | TypeScript, React, TailwindCSS, Express, Vite

Apr. 2023 - Present

- A small store app that allows users to add a selection of food items to their cart and check them out.
- Created a REST API that handles adding/deleting items from an Express server.
- Using React and TailwindCSS to make a simple and interactive UI for users

### Stocks Prediction | Python, Jupyter Notebook, TensorFlow, Pandas, NumPy, yfinance

Sep. 2022 – Oct. 2022

- Implemented an LSTM model with other members to predict the price of a particular stock within the next minute using previous prices within a month in one-minute intervals
- Worked on gathering datasets for stock prices learning and testing using the yfinance library

### Find My Professor | Go, GraphQL, SQL, PostgreSQL

Sep. 2022 – Nov. 2022

- Provides you with a list of professors and their review and rating analysis given a school name and course code
- Worked on the back-end and implemented query resolver functions for professors and courses
- Used SQL to manage CRUD operations on the PostgreSQL database used for this project
